1. NATURE OF OPERATIONS AND GOING CONCERN

Oceanic Iron Ore Corp. ("Oceanic" or the "Company") is an exploration stage company engaged in the acquisition and exploration of iron ore properties in Québec, Canada. The Company was incorporated on March 8, 1986 under the British Columbia Business Corporations Act. The Company maintains its head office at 595 Burrard Street, Suite 3083, Vancouver, British Columbia. The Company's registered and records office is located at 1900-600 Granville Street, Vancouver, British Columbia. Its common shares are traded on the TSX Venture Exchange under the symbol "FEO" as well as the OTCQX in the United States under the symbol "FEOVF".

The Company acquired a 100% interest in certain mining claims (the "Property") located near Ungava Bay, Québec, Canada in November, 2010. The Company is currently conducting exploration activity on the Property.

While these financial statements have been prepared on the basis that the Company will continue as a going concern, which contemplates the realization of assets and settlement of liabilities in the normal course of business as they come due, there are certain conditions and events that may cast significant doubt on the validity of this assumption. For the six months ended September 30, 2013, the Company reported a loss of $1,272,922 and as at that date had an accumulated deficit of $21,930,203 and a working capital balance of $4,029,555. The Company will need to raise sufficient funds in order to finance ongoing exploration, development and administrative expenses over the coming 12 months. The success of raising such funds cannot be assured. Factors that could affect the availability of financing include the Company's performance, the state of international debt and equity markets, investor perceptions and expectations, the retention of key executive management and the state of global financial and metals markets. These financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and statement of financial position classifications that would be necessary were the going concern assumption deemed to be inappropriate, and these adjustments could be material.

2. BASIS OF PRESENTATION

These condensed interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") applicable to the preparation of interim financial statements, including International Auditing Standard 34, Interim Financial Reporting ("IAS 34") as issued by the International Accounting Standards Board. These condensed interim financial statements do not include all disclosures required for annual audited financial statements. Accordingly, they should be read in conjunction with the notes to the Company's audited annual financial statements for the year ended March 31, 2013. The accounting policies followed in these condensed interim financial statements are the same as those applied in note 3 of the Company's audited annual financial statements for the year ended March 31, 2013, except for the adoption of new standards as described in note 3(a) of the unaudited condensed interim financial statements for the three months ended June 30, 2013 and 2012.

The date the Board of Directors approved these condensed interim financial statements on November 28, 2013.

3. RECENTLY ISSUED ACCOUNTING STANDARDS

a) Recently issued and applied accounting standards

As of April 1, 2013, the Company adopted several new and amended IFRS pronouncements in accordance with the transitional provisions outlined in the respective standards as listed in note 3(a) of the unaudited condensed interim financial statements for the three months ended June 30, 2013 and 2012.

b) Accounting standards recently issued but not yet applied

IFRS 9 – Financial instruments

In November 2009, the IASB issued IFRS 9 Financial Instruments as the first step in its project to replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. The basis of classification depends on an entity's business model and the contractual cash flows of the financial asset. Classification is made at the time the financial asset is initially recognized, namely when the entity becomes a party to the contractual provisions of the instrument. IFRS 9 amends some of the requirements of IFRS 7 Financial Instruments: Disclosures, including added disclosures about investments in equity instruments measured at fair value in OCI, and guidance on the measurement of financial liabilities and derecognition of financial instruments.

In July 2013, the IASB tentatively decided to defer the mandatory effective date of IFRS 9. The IASB agreed that the mandatory effective date should no longer be annual periods beginning on or after January 1, 2015 but rather be left open pending the finalization of the impairment and classification and measurement requirements. The Company has not yet begun assessing the impact of adopting IFRS 9 on its financial statements, including the applicability of early adoption.

6. DEMAND LOAN

The Company is eligible to receive a refundable tax credit of 38.75% of eligible exploration expenditures incurred in Québec (“Exploration tax credits”). The refundable tax credit can only be claimed in conjunction with the filing of the Company’s annual corporate tax return.

In order to monetize the expected refundable tax credits due for the year ended March 31, 2012, the Company entered into a demand loan agreement with National Bank of Canada (“National Bank”) on December 5, 2011 to borrow up to $4,500,000, representing a proportion of the estimated Québec Exploration refundable tax credits receivable from Revenu Québec based on the Company’s eligible expenditures to March 31, 2012.

The Company provided the bank security by way of charges on its 2011 and 2012 Québec Exploration tax credits receivable, a general assignment of the Company’s personal and movable property and a $150,000 cash pledge to Investissement Québec, the guarantor of the loan. The loan was scheduled to be repaid on the earlier of (a) August 31, 2013 or (b) upon collection of the Québec Exploration tax credits, which were assigned to Investissement Québec. The demand loan bears interest at National Bank’s prime rate payable on a monthly basis. Interest expense for the three and six months ended September 30, 2013 was $19,253 (2012: $20,685) and $42,869 (2012: $35,905) respectively.

In August 2013, the National Bank of Canada extended the maturity date of the demand loan to September 30, 2013. The guarantee provided by Investissement Québec relating to the demand loan expired the earlier of September 30, 2013 and the date on which the demand loan is repaid.

On September 9, 2013, the Company received Exploration tax credits in the amount of $4,678,315 and $3,123,190 of the Exploration tax credits received were used to pay the demand loan in full.

7. CONVERTIBLE DEBENTURE

On May 23, 2013, the Company completed a non-brokered financing of $3 million by way of issuance of a convertible debenture, which bears interest, payable quarterly, at a rate of 6% over a 30 month term.

The principal amount of the debenture is convertible to common shares of the Company at a price of $0.16 per share at the election of the subscriber. In addition, and subject to receipt of all required regulatory approvals, the Company has the right at any time to pay all or any part of the unpaid principal in respect of the debenture in common shares, where the issue price of each common share will be equal to the volume weighted average trading price for the 20 days prior to the date of notice of the conversion.

In the event that the volume weighted average trading price of common shares is equal to or greater than $0.16 per share for any 20 consecutive trading day period during the term of the debenture, the principal and interest owing under the debenture will be automatically converted into common shares of the Company.

For accounting purposes, the convertible debenture is separated into its liability and equity components using the effective interest rate method. The fair value of the liability component at the time of issue was calculated as the discounted cash flows for the convertible debenture assuming a 20% effective interest rate which was the estimated rate for a convertible debenture without a conversion feature. The fair value of the equity component (conversion feature) was determined at the time of issue as the difference between the face value of the convertible debenture and the fair value of the liability component, less a deferred income tax adjustment to reflect the book to tax difference in value of the convertible debenture at the time of issuance.

Issuance costs of $210,448 were incurred and have been recorded against the liability and equity components and are being amortized to the statements of loss and comprehensive loss over the life of the convertible debenture. Accretion and other financing expense for the three and six months ended September 30, 2013 was $82,075 (2012: $nil) and $131,969 (2012: $nil) respectively.

On October 10, 2012, the Company completed a brokered private placement comprising 21,875,000 common shares, at a price of $0.16 per common share for gross proceeds of $3,500,000. The Company incurred cash share issue costs in the amount of $339,589 in connection with the private placement.

<u>Shares in escrow</u>

4,800,000 common shares are held in escrow at the date this report was approved by the board of directors. All remaining shares held in escrow will be released on December 3, 2013.

(c) Stock options

The Company has established a "rolling" stock option plan (the "Plan") in compliance with the TSX Venture Exchange's policy for granting stock options. Under the Plan, the maximum number of shares reserved for issuance may not exceed 10% of the total number of issued and outstanding common shares and the term of any option granted under the Plan may not exceed ten years. The exercise price of each option shall not be less than the market price of the Company's stock at the date of grant. Each option vesting period is determined on a grant by grant basis. Stock options are settled through the issuance of the Company's common shares.

A summary of the changes in stock options is as follows:

	Options		Weighted average exercise price
